

RAPHAEL MATTHEW E. PEROCHO

COMPUTER ENGINEERING UNDERGRADUATE

Woodway Townhomes, Talisay City, 6045 | raphaelmatthew.perocho@gmail.com | 09561381946

SUMMARY

Detail-oriented Computer Engineering undergraduate and Web Developer specializing in scalable backend architectures, robust database schema design, and hardware-software integration. Proven track record of academic diligence as a consistent Dean's Lister, with practical project experience structuring multi-tenant SaaS environments and scripting dynamic automation firmware. Combines strong engineering principles with efficient database administration to engineer secure, high-performance web applications

ADDITIONAL INFORMATION

Soft Skills

- Willingness to learn and be trained
- Proficiency in English
- Able to multi task effectively
- Flexible in working with diverse individuals

Portfolio

<https://portfolio-perocho-0.vercel.app/>

Technical Skills

- Programming Languages: C/C#, TypeScript, Python
- Framework & Libraries: Next.js, React, Tailwind CSS
- Developer Tools: Github, VS Code, Supabase, Godot Engine

Awards

- Dean's Lister 2024-2025

PROJECTS

DevFlow - Multi-Tenant Project (SaaS)

Next.js, Vercel, Supabase, Tailwind CSS

- Contributed as a core backend developer for a specialized multi-tenant SaaS application tracking development cycles.
- Structured relational database tables and designed role-based access control (RBAC) layers.

TypeSlasher - Typing Rogue-lite RPG Game

Godot Engine v4

- Developed typing-based rogue-lite RPG gameplay, scripting core progression mechanics and discrete boss encounters.
- Optimized user-input interaction systems and game loop state machines for smooth game performance.

Analog Temperature Monitoring & Automated Cooling System

LM358 Op-Amp, NTC Thermistor, NPN Transistors, 5V Cooling Fan

- Engineered a microcontroller-free, purely analog circuit to automate a cooling fan and buzzer alert based on thermal shifts.
- Utilized an LM358 operational amplifier as a comparator to successfully trigger peripheral hardware outputs at specific voltage thresholds.

EDUCATION

Cebu Institute of Technology - University

Bachelor of Science in Computer Engineering

2023 - Present

University of San Jose - Recoletos

Science, Technology, Engineering, and Mathematics (STEM)

2021-2023
